

CFX-750 & CFX-750 Lite

DISPLAYS

The flexible CFX-750™ displays allow you to easily perform day-to-day farming tasks, extend your operating hours and enhance the productivity of your farm. Available in a range of configurations and price points, you can customise your display to suit the specific steering and application control needs of your farm.

SIMPLE INSTALLATION AND EASE OF USE

With their colour touchscreen and intuitive interface, the CFX-750 displays allow you to quickly access guidance lines and coverage maps to easily perform everyday farming tasks.

PRECISE FARMING—WHEREVER YOU OPERATE

The CFX-750 displays are compatible with a variety of satellite constellations and accuracy levels—ideal for almost any location, crop type, field shape, or soil type.

ENHANCED PLANTING AND NUTRIENT/PEST MANAGEMENT

Maximise your efficiency when planting, spraying, spreading, and strip tilling with optional Field-IQ™ crop input control capabilities to accurately apply crop inputs and save money.

AVAILABLE ACCURACY LEVELS

Choose the right accuracy for your farming operations. Our high-performance correction options range from high-accuracy to entry-level in a variety of delivery options.

Benefit from unmatched reliability and uptime no matter where you are located.

STEERING AND APPLICATION OPTIONS

Consider the following options at initial purchase or as upgrades later on.

- ▶ Automated steering
- ▶ Manual guidance and mapping
- ▶ Boom height control for sprayers
- ▶ Seed monitoring
- ▶ Multiple product variable rate application control
- ▶ Automatic section control
- ▶ Basic yield monitoring
- ▶ Wireless data transfer for in-office analysis

The CFX-750 displays are also compatible with Trimble® assisted or automated steering systems such as the Autopilot™, EZ-Pilot®, or EZ-Steer® system, to complete your total guidance package and operate with ease.

Key Features

- ▶ Mid-sized 20.3 cm colour touchscreen display
- ▶ Rugged construction for everyday field use
- ▶ 27 built-in LED lights
- ▶ Two video camera inputs
- ▶ High-performance, integrated GPS/GNSS receivers

CFX-750 AND CFX-750 LITE DISPLAYS

INTRODUCING THE CFX-750 LITE DISPLAY

The CFX-750 Lite display is fully upgradeable to allow the user to access more functionalities when needs change. Both the CFX-750 display and the CFX-750 Lite display can be unlocked for the same functionality when appropriate unlocks are applied.

Feature	CFX-750 Lite Display	CFX-750 Display

Auto Guidance	Available	Standard
Coverage Logging	Standard	Standard
Field-IQ System	Available	Standard
Variable Rate Application	Available	Available
External Implement Switch	Available	Available
GLONASS	Standard	Available

Autopilot Motor Drive System

OPTIONAL FEATURES

Auto Guidance

Trimble offers assisted and automated steering options to help keep your farming vehicles on line-so you can focus on other farming tasks. With the added benefit of terrain compensation technology, you can operate in difficult terrain conditions while minimizing skips, overlaps, and guess rows.

Application Control

- ▶ Simultaneously control the application rate of up to two different materials
- ▶ Create a high-yielding environment with accurate seed placement
- ▶ Control up to 48 rows individually to save on seed and input costs
- ▶ Instantly adjust the height of boom sections with sensors that measure the distance between ground cover or plant canopy

Variable Rate Application and Section Control

- ▶ Connect with the Trimble TUVR protocol and other available protocols for implement Variable Rate Application and Section Control

CenterPoint RTK < 2.5 cm accuracy	CenterPoint VRS™ < 2.5 cm accuracy	CenterPoint RTX 3.8 cm accuracy	OmniSTAR® HP 5–10 cm accuracy	OmniSTAR G2 8–10 cm accuracy	OmniSTAR XP 8–10 cm accuracy	RangePoint RTX < 15 cm accuracy	OmniSTAR VBS 15–20 cm accuracy	SBAS (EGNOS) 15–20 cm accuracy
