Aviation Antenna HX-GA483A

HX-GA483A antenna has been designed to support high accuracy aerial, land and marine applications in one compact design with high-performance and lightweight.

This antenna is an aviation type of design, which has 4 holes bulkhead mounting allows the antenna to be used in the most rugged of environments. This is an ideal design for customers building machine control systems. The antenna can be mounted flush with the vehicle surface or on the top of a pole mount. The TNC connector is located on the underside of the unit ensuring the attached cable is also protected from the environment.
